Saccades v1.0
Standard License Agreement

This is an individual user license agreement (hereinafter referred to as 'License Agreement') for the use of the Saccades Software in the version mentioned below. To be able to run Saccades, a license key is needed. A license key will be issued only upon receipt of a fully completed and signed License Agreement. Upon signature of this License Agreement, Licensee agrees to be bound by its terms and conditions.

To this License Agreement the Saccades Standard Terms & Conditions (issue February 2013) (hereinafter referred to as 'SSTC'), that are attached to this License Agreement, do apply. However, the conditions of this License Agreement do prevail.

Product Information
The License Agreement concerns the following Saccades Software:

Product name: Saccades version 1.0.0

Product summary:
The Saccades software provides an open and configurable environment for integrating 3D visualization with simulators such as EuroSim. It is based on the OpenIGS framework.

Product environment:
The environment that is required to run Saccades is outlined in the Software User's Manual, for each platform.

Product documentation:
- Saccades v1.0.0 User Manual (online)
- Saccades v1.0.0 Software Release Note

Licensed CPU: (to be completed by Licensee)

Demo | Evaluation | Nodelocked

License period: (Licensee to select the license period)

Period: Perpetual | End date:……………………..

Project: (Only applicable in case of license with end date)

Project name:………………………………………………

List Price: (to be completed by Cesium Software)

...............…………………………………………………

Maintenance Fee and Maintenance Period:

...............…………………………………………………

License Type and Period

The *Saccades Software Demo license* is a floating license and no license key is required, however the software is restricted in its functionality. The terms of the SSTC still apply to this license.

The *Saccades Software Evaluation license* is a floating license but typically for a shorter time period with restricted functionality
.
The *Saccades Software Standard license* is node locked for a longer and fixed period of time with unconstrained functionality.

The Saccades Software license with a defined end date provides the user the requested Saccades Software license for a limited period as specified in this License Agreement. Such license is always limited to use within the specified project and may include maintenance.
